

PennHIP Report

Referring Veterinarian: Dr Carl Myers
 Email: carl.myers@theodorevet.com

Clinic Name: Theodore Veterinary Hospital
 Clinic Address: 5761 Hwy 90 West
 Theodore, AL 36582
 Phone: (251) 653-7831
 Fax: (251) 653-9289

Patient Information

Client: Green (Kirby), Tara
 Patient Name: Royal Croft Jack Skye (Serbia)
 Reg. Name: Royal Croft Jack Skye (Serbia)
 PennHIP Num: 127217
 Species: Canine
 Date of Birth: 21 Feb 2017
 Sex: Male
 Date of Study: 20 Feb 2019
 Date of Report: 22 Feb 2019

Tattoo Num:
 Patient ID: 67023
 Registration Num: DN51856701
 Microchip Num: 528224001015976
 Breed: OLD ENGLISH SHEEPDOG
 Age: 24 months
 Weight: 68.2 lbs/30.9 kgs
 Date Submitted: 20 Feb 2019

Findings

Distraction Index (DI): Right DI = 0.20, Left DI = 0.18.
 Osteoarthritis (OA): No radiographic evidence of OA for either hip.
 Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.20.

OA Risk Category: The DI is less than or equal to 0.30. This patient is at minimal risk for hip OA.

Distraction Index Chart:

BREED STATISTICS: This interpretation is based on a cross-section of 292 canine patients of the OLD ENGLISH SHEEPDOG breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.28 - 0.78) for the breed. The breed average DI is 0.53 (solid square). The patient DI is the solid circle (0.20).

SUMMARY: The degree of laxity (DI = 0.20) ranks the hip within the tightest 5% of DIs for the breed. This amount of hip laxity places the hip at a minimal risk to develop hip OA. No radiographic evidence of OA for either hip.
